Proton Fluctuation.
J. Phys. Chem. 95, (1991), 4883-4889.
- 21) A. Palleschi, **G. Paradossi**, B. Pispisa.
Influence of Polypeptides on the Reactivity of Thiols toward
Iron(III) Complex Ions.
J. Mol. Cat. 62, (1990), 369-382.
- 20) **G. Paradossi**, A. Palleschi, A. Desideri, B. Pispisa.
Environmental Control of Reactions: Influence of Poly(Glutamate)
on the Reactivity of Cysteine-QuaterpyridineIron(III) Mixtures.
Biopolymers 29, (1990), 921-933.
- 19) B. Pispisa, A. Palleschi, **G. Paradossi**.
Stereoselective Electron-Transfer Between Chiral Substrates and

Metal Chelates Anchored to Polypeptides.
Biopolymers 28, (1989), 319-331.

- 18) B. Pispisa, **G. Paradossi**, A. Palleschi, A. Desideri.
Oxidation of L-Thiols in the Presence of Iron(III) Complex Ions Anchored to Asymmetric Polymers. A Kinetic and Conformational Investigation.
J. Phys. Chem. 92, (1988), 3422-3429.
- 17) **G. Paradossi**, F. Bordi, C. Cametti.
Dielectric Study of Low Molecular Weight Mannan Triacetate in Chloroform.
Int. J. of Biol. Macromol. 9, (1987), 95-97.
- 16) H. Chanzy, S. Perez, D. Miller, **G. Paradossi**, W. T. Winter.
An Electron Diffraction Study of the Mannan I. Crystal and Molecular Structure.
Macromolecules 20, (1987), 2407-2413.
- 15) B. Pispisa, A. Palleschi, **G. Paradossi**.
Theoretical Models of Diastereomeric Noncovalent Electron-Transfer Reactions.
J. Phys. Chem. 91, (1987), 1546-1553.
- 14) B. Pispisa, A. Palleschi, **G. Paradossi**.
Asymmetrically-Selective Oxidation of Catechol Derivatives by Iron(III) Complex Ions Anchored to Polypeptides.
J. Mol. Cat. 42, (1987), 269-284.
- 13) B. Pispisa, A. Palleschi, M. Barteri, **G. Paradossi**.
Stereoselective Catalytic Activity of Fe(III) Complex Ions Anchored to Biopolymers.
Macromolecules 86 (Oxford), (1986), 79-80.
- 12) D. Miller, H. Chanzy, **G. Paradossi**.
Evaluation of Diffraction Data from Electron Diffraction Patterns of Natural Polymers Microcrystals.
J. Phys. C5 47, (1986), 101-107.
- 11) B. Pispisa, A. Palleschi, **G. Paradossi**, S. Chiavarini.
Transition State Effects in Stereoselective Electron-Transfer Reactions.
Gazz. Chim. Ital. 116, (1986), 423-429.
- 10) B. Pispisa, R. Rizzo, **G. Paradossi**, M. Barteri.
Energetics of Formation of Electron-Transfer Complexes Between Asymmetric Species.
J. Inorg. Biochem. 26, (1986), 281-287.
- 9) **G. Paradossi**, B. Pispisa, R. Rizzo, M. Barteri.
Chiral Discrimination in the Energetics of Formation of

Diastereomeric Adducts Involving Polypeptides.
Biopolymers 25, (1986), 1249-1258.

- 8) B. Pispisa, A. Palleschi, **G. Paradossi**.
Chiral Discrimination in Electron-Transfer Reactions Between
Asymmetric Species.
Rev. Port. Quim. 27, (1985), 316-317.
- 7) M. Schmidt, **G. Paradossi**, W. Burchard.
Remarks on the Determination of Chain Stiffness from Static
Scattering Experiments.
Makromol. Chem., Rapid Commun., 6, (1985), 767-772.
- 6) R. Rizzo, **G. Paradossi**, V. Crescenzi.
Macroion-Counterions Interactions in Dilute Aqueous Solution of
iota- and kappa- Carrageenan Segments.
Makromol. Chem. 185, (1984), 757-764.
- 5) V. Crescenzi, A. Gamini, **G. Paradossi**, G. Torri.
Solution Properties of a New Polyelectrolyte Derived from the
Polysaccharide Scleroglucan.
Carbohydrate Polymers 3, (1983), 273-286.
- 4) F. A. Mayer, **G. Paradossi**.
The Mechanism of Thermal Degradation of a High Molecular Weight
Glycoprotein Complex from Bovine Cervical Mucus.
Biochem. J. 209, (1983), 565-572.
- 3) **G. Paradossi**, D. A. Brant.
Light Scattering Study of a Series of Xanthan Fractions in Aqueous
Solution.
Macromolecules 15, (1982), 874-879.
- 2) V. Crescenzi, M. Dentini, **G. Paradossi**, R. Rizzo.
Conformation-Dependent Interactions Between Ionic Polysaccharides
and Counterions in Dilute Aqueous Solution.
Polym. Bull. 1, (1979), 777-784.
- 1) V. Crescenzi, M. Dentini, **G. Paradossi**, R. Rizzo.
On the Optical Activity of Pseudoisocyanine Bound by Sulfated
Polysaccharides in Dilute Aqueous Solution.
Polym. Bull. 1, (1979), 771-776.
