

AVVISO DI SEMINARI

Il giorno 12/06/2024 alle ore 12:00
nell'Aula Seminari del Dipartimento di Scienze e
Tecnologie Chimiche

Prof. Neus Sabaté

Research Professor at Institute of Microelectronics of
Barcelona
(IMB-CNM-CSIC).

Terrà un seminario dal titolo:

**Self-powered electrochemical sensors as key components of sustainable
single use point-of-care devices**

Proponente: Prof. Alessandro Porchetta

Abstract:

The main goal of Sabate's research is to obtain single-use electrochemical power sources - biofuel cells and batteries - able to provide a double function power autonomy and sensing capabilities to the new generation of point-of-care devices in order to minimize its environmental impact and affordability.¹⁻³ The talk will show examples of this new generation of disposable self-powered approaches and discuss their opportunities and challenges.
